EDUCATION

Indian Institute of Information Technology, Nagpur

July 2022 - July 2026

B.Tech in Electronics and Communication Engineering

Nagpur, India

WORK EXPERIENCE

Shramik Sathi | shramiksathi.com

March 2026 - Present

Founding Engineer

Remote

- Architected and shipped a multi-tenant workforce compliance platform serving **600+ users**, digitizing the statutory muster roll, wage register, and grievance trail across **224 REST APIs** (Node.js, Express.js, TypeScript), a 66-table PostgreSQL schema on Prisma ORM, and 51 Next.js screens.
- Implemented the payroll engine converting attendance into wages with PF, ESI, professional tax, overtime, fines, and arrears, generating **11 inspector-ready statutory registers** and **blocking any run** breaching the 50% deduction cap (Payment of Wages Act) or the 50% basic-pay floor (Code on Wages).
- Engineered asynchronous payroll, export, and PDF processing on **BullMQ and Redis**, and pooled Chromium instead of launching it per document, cutting **200 launches to 1** per payslip run and eliminating render timeouts.
- Secured the backend through JWT rotation and token-family revocation, tenant-scoped middleware, 7-role RBAC with scoping, and append-only audit logging, verified by **2,152 Jest tests** at **77% statement coverage** in 37 suites.
- Deployed the system on AWS EC2 as a 5-container Docker Compose stack (Nginx, API, web, worker, Redis) with RDS PostgreSQL and S3 storage, co-locating the job queue to save **Rs. 1,320/month** versus managed ElastiCache.

Dataline Advertisers

August 2025 - February 2026

SDE Intern

Remote

- Developed **30+ production-grade REST and WebSocket APIs (Python, FastAPI)** with async webhook handling and event-driven call state management for an enterprise AI voice-calling product, achieving **99.9% API uptime**.
- Designed a **custom RAG pipeline** using OpenAI embeddings and a **Firestore vector database**, implementing a scalable retrieval architecture and improving search accuracy by **40%**.

PROJECTS

SupportPilot | FastAPI, Python, LangGraph, PostgreSQL, pgvector, Redis, WebSockets, Next.js, Docker **GitHub | Live**

- Launched a **multi-tenant agentic AI support platform** with **80 REST and WebSocket APIs**, a 19-table PostgreSQL schema, RBAC, and RAG search (**100% context precision, 97% recall, 93% relevancy** via RAGAS).
- Devised a **15-node LangGraph agent pipeline** with classification, risk detection, groundedness checks, and deterministic policy decisions, using **PostgreSQL checkpointing** for resumable runs, wrapped in a **5-layer guardrail system**, prompt-injection sanitization, a backend **tool gateway**, human-in-the-loop approvals, and server-side refund bounds.
- Delivered **zero-loss real-time WebSocket messaging** via monotonic cursor replay, circuit breakers, and dead-lettering, backed by **500+ automated tests**; replaced Celery with cron-driven jobs to **eliminate always-on infrastructure cost**.

AgentLens | Python, FastAPI, Redis Streams, PostgreSQL, Next.js, TypeScript, Docker

GitHub | Live

- Built a **distributed LLM observability platform** with a **LangChain/LangGraph SDK** streaming agent traces to **Redis Streams** across **three consumer groups**, adding **29 μ s p99** latency while sustaining **744 events/s** at **zero loss**.
- Guaranteed **idempotent ingestion** over at-least-once delivery via unique constraints, **ON CONFLICT** upserts, **dead-letter queues**, and **SIGTERM** draining, preventing duplicates during worker restarts and redeployments.
- Hardened AgentLens with **JWT/OIDC, Argon2id, RBAC**, and checksum-validated PII and prompt-injection guardrails (**100% recall, 0% false positives**); added a batched **LLM-as-judge** evaluator with per-tenant budget caps, all covered by **312 tests** in **GitHub Actions CI**.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL

Backend & AI: Node.js, Express.js, FastAPI, JWT, RBAC, RAG, RAGAS, LangChain, LangGraph, Celery

APIs, Queues & Testing: REST APIs, WebSockets, Prisma ORM, BullMQ, Redis Streams, OpenAI API, Jest, Postman

Distributed Systems & AI Safety: Event-Driven Architecture, PII Redaction, Prompt-Injection Defense, LLM Evaluation

Databases: PostgreSQL, pgvector, MongoDB, Redis, MySQL, Firebase, Firestore, Pinecone

Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS, TanStack Query

Cloud & DevOps: AWS (EC2, RDS, S3), Docker, Nginx, Vercel, Render, CI/CD, GitHub Actions, Git, GitHub

ACHIEVEMENTS

- Earned **Knight rank** on **LeetCode** (top **4.4%** globally).
- Ranked **880th globally** (top **2.7%**) in LeetCode Biweekly Contest 154.
- Solved **1,000+** DSA problems on LeetCode, CodeChef, GeeksforGeeks, and Codeforces.
